Dear Roger,

This letter is in response to notification from your agency regarding closed captioning of my syndicated fly fishing show, TROUT TV. Case identifier is: CGB-CC- 0029

Your letter of January 23, 2013, informing me of deficiencies regarding my petition for extension of my "pending" status (compliance with FCC closed captioning) arrived in my hand on January 26, 2013. After reading carefully, I decided that the best course of action was to try to do what ever it takes (within my limited resources) to tool up and achieve the capability to deliver programming that would include closed caption encoding.

Before laying out my attempts for compliance I think it is important that my predicament be fully understood. I have been struggling to keep the show (TROUT TV) in production over the past several years. The most critical aspect to understanding my situation is my schedule of programming. All episodes that will air in 2013 (full 52 week schedule) were all shot during spring summer and fall of 2012. My payoff (my 2013 income) for these shows comes in sponsorship monies paid to me by fulfilling (airing) sponsor commercials during the 2013 broadcast season. This is my only means for recovering (2012) production costs and generating some income for. As per your letter, if my pending status is revoked and I am not able to deliver the show after April 23, I will be in default with all of my sponsor agreements, losing all of my accounts payable for the 2013 season income, not to mention all my time and costs of production in 2012.

This said I now move on to why I decided the best solution to this quandary was to tool up and achieve the capability to deliver "closed caption" programming by deadline. The idea of securing some sort of "closed captioning" sponsor (underwriter) for my type of show and distribution system is difficult to near impossible. To state it as simply as possible; I deliver the show physically on external hard drives for HD broadcast, and DVD media for SD. The show airs in about 35 different markets in the greater Pacific Northwest. Some of these are very small and a few are major markets. For me to seek out a local CC sponsor in each market for each station would take literally weeks, perhaps months with who knows what kind of results? Realistically, for me to accomplish closed

captioning I need to fund it from my general sponsorship income which I will gladly do if I can.

Getting back to my attempt to comply as the best means of resolving this situation, the first step I took was to upgrade my editing system from Adobe Premiere CS4 to the latest version CS6 CREATIVE SUITE. (see exhibit A) The cost for this was about \$1,000.00. For this new version of Adobe Premiere CS6, I also had to install some upgrades in my editing computer (see exhibit B) a cost of \$165.00. To install and set up these revisions, I also paid Aaron Nepean (computer engineer) \$300 for technical installation and setup of this updated version (see exhibit C). Specifically the reason for these upgrades is that Adobe Premiere Creative Suite CS6 has the capability to encode "closed caption" .scc files into edited programming. The total for these upgrades is approx \$1,600.00 paid.

What I did not realize nor have other people who upgraded for similar reasons, is that although CS6 can embed .scc code and will play back captions on the edit monitor, it does not have the capability to output this embedded file into any kind of digital media format that I use to distribute my show to the stations. Unfortunately, I did not realize this deficiency existed in CS6, as it is touted to meet the needs of the broadcast industry and specifically the ability to embed .scc files. On yet further investigation I found that the only software that would accomplish the export portion of this process is a supplement product by COMPUTER PROMPTING & CAPTIONING COMPANY (see exhibit D) at a minimum cost of \$3000 which does not include the ability to create .scc files only the ability to export in Mpeg-2 formats. The creation of the .scc code would have to be generated out of house at a cost of \$70 to \$400.00 per episode (see exhibit E). The CPC product that would be capable of creating both the .scc code and the ability to export it in a digital format is about \$7000.00. (see exhibit F)

Any way you slice it, my costs to deliver the show with closed caption coding would require a minimum investment of \$5000.00, but probably significantly more due to the encoding requirements of the various servers used by the respective stations.

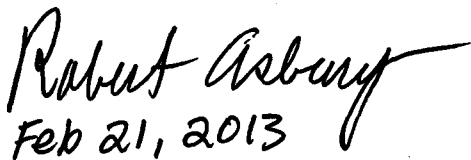

So, on the question; "would this kind of investment cause financial undue burden for my company, Sun West Productions"? The answer is pretty obvious. A look at my tax returns (exhibit G) speaks plainly enough with regards to costs and income generated by the show.

As mentioned on the original petition, I do have a plan of action whereby I believe our financial position can be significantly revised over the next couple of broadcast seasons putting TROUT TV in a position of compliance with the closed caption issue. I am committed to making every effort for this to happen and if this goal is not achieved I am prepared to cease production and distribution of the show.

I hope this further written explanation and documentation is enough to support my plea of "undue burden" with regards to my case. If you need anything further please let me know.

I hereby certify that the information contained in this letter is truthful and accurate and I knowingly sign subject to penalties of perjury.

## DTV vs DTV Encoder

Hi Bob,

CaptionMaker DTV would allow you to create captions from scratch by importing a transcript and then time stamping the resulting captions. You could then embed captions in to MPEG-2 HD program streams for digital delivery. If you have a Mac you could also embed captions in HD H.264 files and ProRes MOV files. DTV is \$6995. In addition you'll also have access to many other formats such as SCC, SMPTE-TT, SRT, etc.

If you already have an existing caption file such as an SCC then DTV Encoder could take that file and transcode it so you can embed the captions in a MPEG-2 program stream on Windows and also h.264 and ProRes files on a Mac. DTV Encoder is \$2995. \*

The dongle we ship you is cross-platform so if you have access to a Mac you'll have those additional exports available to you.

## Automated Captioning & Transcription Pricing

AST's CaptionSync web-automated captioning is straightforward and simple and significantly faster and less expensive than alternative captioning methods. Because CaptionSync is a web-based service, there is no software to purchase, and it is always available.

Simply upload your media to our CaptionSync server and select whether you want captioning, transcription, or both (a transcript is required in order to create caption output). The outputs you select are returned electronically -- no need to ship anything.

	<u><b>Captioning Only</b></u> (have transcript)	<u><b>Transcription Only</b></u>	<u><b>Captioning &amp; Transcription</b></u> (need transcript)	<u><b>Production Transcripts</b></u> (time stamped)
<b>Immediate Turnaround</b>	<b>\$1.48 / minute</b>			
<b>Standard 3-day Turnaround<sup>5</sup></b>		<b>\$1.60 / minute</b>	<b>\$3.08 / minute</b>	<b>\$2.34 / minute</b>
<b>RUSH 24-hour Turnaround<sup>5</sup></b>		<b>\$2.16 / minute</b>	<b>\$3.64 / minute</b>	<b>\$2.90 / minute</b>

Prices are per minute of media.

**Bulk pricing is available for purchases of more than 20 hours; contact us for details.**

### Notes

1. AST will endeavor to caption all content submitted to our system, but content with excessive music or noise may not be captionable by the AST system. Captioning charges only apply for successfully captioned content; failed captioning attempts do not incur caption fees. If you request a transcript, and your content is not captionable, you will receive only the transcript, and you will be billed only for the transcription portion of the fee.
2. Billing resolution is one minute; all submissions are rounded up to the next nearest minute.
3. On approval of credit, terms are Net 30. Invoices are issued monthly.
4. AST makes many caption output formats available; there are no additional charges for requesting and receiving multiple output formats for submission.
5. The turnaround time for transcription is normally less than three business days. RUSH transcription is one business day.
6. Pricing is for caption and/or transcript files for media content that has been electronically submitted to CaptionSync. Call us if you need assistance with other aspects of captioning, including digitization of analog media, audio extraction for formats not supported automatically by our website, or encoding of the final media (which may be required for some media formats).
7. You may pre-purchase time on the CaptionSync server in order to take advantage of volume discounts or if you do not have credit approval with us. Pre-purchased CaptionSync time is non-refundable and expires five years after purchase if not used. The minimum transaction for pre-purchase is \$75.
8. Prices are valid through June 30, 2012.
9. All prices are in US Dollars.

Hi Bob,

I was asked to give you a price for closed captioning. If you email us the transcript

Or send a captioning file the price is \$400 for a 30 minute program. If you do not have

a transcript, we would then outsource it to be done and that would be an additional

\$200. Please let me know if you have any questions.

Thank you

Bob,

Thanks for the offer for Silver Bow Fly Shop to sponsor closed captioning on TROUT TV. This would not really meet our marketing needs but thanks for the offer.

Bob, we will have to decline your offer for sponsorship of closed captioning on your Trout Tv show. Although we do some advertising for our shows, our advertising is specific for each event we produce. Sorry!
